

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Topography and Strategy in the War

By DOUGLAS W. JOHNSON

Associate Professor of Physiography, Columbia University

With some 20 special maps and numerous reproductions of photographs. \$1.75 net

An analysis of the topography of each of the most important theaters of war, together with a summary of the principal campaigns, pointing out how military operations have been influenced by the surface features of the country.

The underlying geographic reasons for the routes of invasion selected by the German armies of the West, for the violation of Belgian neutrality and for the failure of the German efforts before Nancy and Verdun, are made clear.

The remarkable skill of the Russian army in utilizing river and marsh barriers during their great retreat in 1915, the military obstructions retarding the Italian advance and the geographical key to the Allied failures in the Balkans and in Roumania, are among other topics discussed at length.

The book aims to give to the reader a clear comprehension of the most important events in the War to date, and to prepare him for a fuller understanding of future campaigns.

Some portions of the book which appeared in the *Geographical Review* (published by the American Geographical Society) have been brought up to date.

Contents: The Western Theater—Invasion of France—The Deadlock—The Eastern Theater—East Prussian Campaigns—Galician Campaigns—The Great Russian Retreat—The Italian Theater—Campaigns for Italia Irredenta—The Balkan Theater—Campaigns against Serbia—The Roumanian Theater—Conquest of Roumania.

The Andes of Southern Peru The Frontiers of Language and Nationality in Europe

By ISAAH BOWMAN, author of "South America" and "Forest Physiography," and Director of the American Geographical Society of New York.

With detailed topographic maps and about 100 illustrations from photographs. \$3.00 net.

Colonel Theodore Roosevelt has reviewed this book at length in the *Geographical Review* for April, 1917. He says in part as follows:

This is a really notable book; one of those uncommon books in which a man who has had the vision to undertake adventure and the hardihood to carry it through sets forth with wisdom what he has seen. Such combination is rare; for it includes the power to do daring and arduous field work, the knowledge that comes from intensive laboratory investigations, the ability to write vividly and simply, and above all the capacity to extract truth from fact. A book of extraordinary interest and importance, based on first-class original field work.

By LEON DOMINIAN, Map Curator, American Geographical Society.

With 8 maps in color and 12 in black and white, and numerous photographs. \$3.00 net.

This book aims to show that language is a factor in the shaping of nationality, and that its spread is determined by geographic conditions. It deals with some of the fundamental causes which underlie the growth of nationality in Europe, or which explain the conflicting aims of rival powers. The complicated conditions prevailing along linguistic borderlands are described. Especially noteworthy for its clear explanation of the complicated Balkan situation and the relation of the Turkish state to European nationality.

Among the illustrations are eight maps in color and twelve in black and white, showing the linguistic frontiers of Europe. There are over forty photographs of typical European localities of special interest.

"Histories of the Belligerents" Series

Portugal Old and Young

An Historical Study by GEORGE YOUNG. Crown 8vo ($7\frac{1}{2} \times 5\frac{1}{4}$), pp. viii + 342, with a frontispiece and 5 maps. **Net \$2.25.**

A new volume in the Histories of the Belligerents Series, explaining why Portugal is at war.

"One of the best written volumes in a well-known series. He knows all about Portugal and writes about it in a lively way."—*Daily News*.

"Brightly written and thoughtful volume."—*London Times*.

The Balkans A History of Bulgaria, Serbia, Greece, Rumania, Turkey

By N. FORBES, A. J. TOYNBEE, D. MITRANY, and D. G. HOGARTH. Crown 8vo ($7\frac{1}{2} \times 5\frac{1}{4}$), pp. 408, three maps. **Net \$2.25.**

"Accurate, singularly free from bias, and pleasant to read, it gives a surprisingly clear view of a confusing and often difficult subject."—*Athenaeum*.

The Provocation of France Fifty Years of German Aggression

By JEAN CHARLEMAGNE BRACQ. Crown 8vo ($7\frac{3}{4} \times 5$), cloth, pp. vii + 202. **Net \$1.25.**

Clears up many of the dark points hinted at in the day's news and shows the real attitude of France toward Germany.

"This compact little volume is a veritable treasury of information concerning Franco-German history for the last two generations."—*N. Y. Tribune*.

The Evolution of Prussia The Making of an Empire

By J. A. R. MARRIOTT and C. GRANT ROBERTSON. Crown 8vo ($7\frac{1}{2} \times 5\frac{1}{4}$), pp. 460 with 8 maps. **Net \$2.25.**

"A valuable book in a time of need. No other English treatment of the subject shows equal learning and philosophic insight. We may wait long before the appearance of another book which presents so well within three hundred pages the origin and growth of Prussia down to 1848."—*Nation*.

Italy Mediaeval and Modern

A History by E. M. JAMISON, C. M. ADY, K. D. VERNON, and C. SANFORD TERRY. Crown 8vo ($7\frac{1}{2} \times 5\frac{1}{4}$), pp. viii + 564, with 8 maps and a preface by H. W. C. Davis. **Net \$2.90.**

"A clear outline of the subject . . . a brilliant piece of work."—*London Times*.

Marine Biological Laboratory

Woods Hole, Mass.

INVESTIGATION Entire Year

Facilities for research in Zoology, Embryology, Physiology and Botany. Seventy-six private laboratories, \$100 each for not over three months. Thirty tables are available for beginners in research who desire to work under the direction of members of the staff. The fee for such a table is \$50.00

INSTRUCTION July 3 to August 13 1918

Courses of laboratory instruction with lectures are offered in Invertebrate Zoology, Embryology, Physiology and Morphology and Taxonomy of the Algae. Each course requires the full time of the student. Fee, \$50. A lecture course on the Philosophical Aspects of Biology and Allied Sciences is also offered.

SUPPLY DEPARTMENT Open the Entire Year

Animals and plants, preserved, living, and in embryonic stages. Preserved material of all types of animals and of Algae, Fungi, Liverworts and Mosses furnished for classwork, or for the museum. Living material furnished in season as ordered. Price lists of Zoological and Botanical material sent on application. State which is desired. For price lists and all information regarding material, address

GEO. M. GRAY, Curator, Woods Hole, Mass.

The annual announcement will be sent on application to The Director, Marine Biological Laboratory, Woods Hole, Mass.

SCIENCE PROGRESS

A QUARTERLY REVIEW OF SCIENTIFIC THOUGHT, WORK AND AFFAIRS

EDITED BY SIR RONALD ROSS, F.R.S., D.Sc., M.D., Etc.

SCIENCE PROGRESS owes its origin to an endeavor to found a scientific journal containing original papers and summaries of the present state of knowledge in all branches of science. The necessity for such a journal is to be found in the fact that, with the specialization which necessarily accompanies the modern development of scientific work and thought, it is increasingly difficult for even the professional man of science to keep in touch with the progress achieved and the trend of thought in subjects other than those in which his immediate interests lie. This difficulty is felt by teachers and students in schools and colleges, and by the general educated public interested in scientific questions. SCIENCE PROGRESS claims to have filled this want.

Published early in January, April, July, and October, by John Murray, 50a, Albemarle Street, London, W., England. Annual Subscription, \$4.80 (including postage). Single numbers \$1.20 (postage 10 cents).

An Important Contribution to the Literature of Science

A Short History of Science

BY

W. T. SEDGWICK,

Professor of Biology

H. W. TYLER,

Professor of Mathematics

at the Massachusetts Institute of Technology

The history of science is as engrossing as the history of Greece and Rome and gives as sure an indication of the growth of civilization as does the history of philosophy, art, literature, or music.

The literature of science has always been more or less technical both in the subject matter and the form of its presentation, and Professors Sedgwick and Tyler have rendered a great service to the lay reader as well as to the student in writing a history of the development of science from its remotest period, through the romance of Mediaeval astrology and alchemy to the tremendous achievements of the last centuries.

"A Short History of Science" is one of the first books of its kind in English and is the result of the authors' many years of joint teaching of the subject. It is a book which will prove of the greatest value to Universities, Colleges, Scientific and Technical schools, and is especially adapted to general reading and reference.

With Appendices and Illustrations. Cloth, 8vo, \$2.50

“Humanized Science”

is what a reviewer calls

An Introduction to Science

By **BERTHA M. CLARK, Ph.D.**, Head of Science Department, William Penn High School, Philadelphia. 494 pages. Price, \$1.20

“Dr. Bertha Clark has attempted, successfully, to build up a body of scientific material for freshmen in high school, drawn from the problems of a scientific nature which confront the pupils in their home life and outdoor life. The book is, therefore, not ‘pure science’ but ‘humanized science’; and the author attempts to organize these problems and their solutions so as to leave the pupils with a scientific point of view of their problems and their solution. Hence we have an introduction to science of a kind likely to be of great value to the pupil.”

AMERICAN BOOK COMPANY
New York Cincinnati Chicago

NORTON'S ELEMENTS OF GEOLOGY

One of the standard elementary textbooks in the subject

BECAUSE

It keeps before the student's mind the evolutionary nature of geologic processes.

It gives a clear, simple, logical treatment of the elements. Irrelevant material is omitted.

It makes no artificial separation between dynamic and structural geology.

It provides an abundance of problems for student solution, including many exercises in reading geologic history from the records left in land forms and rock structures.

Parts I and II deal with geological processes, external and internal; Part III with historical geology.

462 pages, illustrated, \$1.40

The Ellen Richards Research Prize

The Naples Table Association for Promoting Laboratory Research by Women announces the offer of a research prize of \$1000.00 for the best thesis written by an American woman embodying new observations and new conclusions based on independent laboratory research in Biology (including Psychology), Chemistry or Physics. Papers published before 1916 will not be considered and these presented for a Ph.D. degree are not eligible. Theses offered in competition must be in the hands of the Chairman of the Committee on the Prize before February 25, 1918. Application blanks may be obtained from the secretary, Mrs. Ada Wing Mead, 823 Wayland Avenue, Providence, R. I.

Flora of the Rocky Mountains and Adjacent Plains

By **PER AXEL RYDBERG, Ph.D.**

Curator in the New York Botanical Garden

8vo xii+1110 pages 1917

Contains descriptions of the native and naturalized Flowering Plants and Ferns of Colorado, Wyoming, Montana, Saskatchewan, Alberta, Idaho, Utah, the western counties of Nebraska, South Dakota and North Dakota and the Kootenay districts of British Columbia.

Published by the author. Price \$3.75 net.
